TAKE PRIDE IN YOUR BRAVE DECISION AND LET’S GO!
WHY YOU NEED SUPPLEMENTS

From the Desk of Erin Alejandrino,
Vice President of Supplementation,
FBBC Approved / TruLean

Imagine for a moment dramatically improving your weight-loss results, energy levels, daily well-being, and even your moods, simply by ADDING all-natural supplements to your routine.

For too long, you’ve been told that proper diet and nutrition means taking things away, and that the only way to improve your health is to change what you eat. Make no mistake, at FBBC Approved/TruLean, we believe in a healthy diet based on whole foods.

The surprising truth, however, is that most people who struggle with their weight are eating too LITTLE food, not too much. As you’ll discover with the program, you will most likely eat more total food than you ever have before.

In a similar way, you will discover that ADDING these pure, clean, great-tasting supplements to your routine will unlock a level of fat loss, energy, confidence, and beauty unlike anything you’ve ever experienced before. To me, that’s the best part of supplementation - you get to add good things to your life instead of depriving yourself.

So, get excited! You’re going to fall in love with these supplements because of their delicious flavors and the amazing benefits they bring to your weight-loss journey. Soon, they’ll become second nature to you, and with consistent results, you’ll wonder why everyone isn’t taking these supplements!
FISH OIL

Improve your body, brain, and heart by taking a daily dose of Omega-3 fatty acids found in Fish Oil. These acids have been shown to prevent heart disease and aid in cognitive functions.
**Ingredients**

Omega-3 Fatty Acids (EPA and DHA)

**Benefits*  

Assists in the prevention of heart disease  
Supports brain function  
Controls cholesterol  
Supports muscle activity  
Supports cell growth  
Fights inflammation  
Supports joint function and repair  
Supports a restful night’s sleep

*When used with a sensible diet and exercise program to maximize results.

**Timing:** Right after dinner. For best results, make sure dinner is high in other healthy fats. The body absorbs Fish Oil three times faster when ingested with another fat.

So, why don’t you just eat more fish and call it a day?

Well, most of our fish is often poorly farmed or raised. That means it contains a lot of heavy metals like mercury, which can build up in the body over time and lead to serious health issues. That also means most commercially available fish does not contain enough EPA and DHA to provide the full benefits listed above.
MULTIVITAMIN

Get ALL your body's most needed vitamins and minerals with our easy-to-swallow and fast absorbing Multivitamin. This daily dose contains 100% of the recommended intake you need to promote a lean figure, increase your energy, and bring a healthy glow to your skin and nails.
